

How to pitch

It is important to pitch correctly to adhere to fire safety regulations.

When facing the pitch:

Pitch your caravan, motorhome or tent on the left hand side

If you have an awning, it goes in the middle

(On the gravel or grass, depending on your pitch type)

Park your car on the right hand side

Caravans must have tow-bars at the front of the pitch.

You may be asked to move if you are pitched incorrectly or on the wrong pitch type. See your booking confirmation email for the type of pitch you have booked.

The instructions here may not suit European vehicles. Please ask a member of the team if in doubt.
